Now, legacy groupware systems are used for a range of communications and data exchange functions and are slowly becoming useful for remote users. An intranet, on the other hand, is for users who are in geographically diverse areas and want to control information dispersed throughout different offices or homes, or even while employees are traveling.

Chapter 3--Intranets Versus Traditional Groupware

KEY TOPICS: This book presents the most up-to-date, thorough review of the groupware marketplace available, with special focus on the dramatic growth of intranets. It covers hot groupware topics such as desktop videoconferencing, e-mail and messaging technologies, and new Web-base meeting software. It also includes sections on implementing groupware in vertical markets, ranging from the construction industry, to consulting firms, to hardware and software development teams.
