Answers

Franklin & Marshall Environmental Science
• Environmental science
focuses on the
relationships between
people and Earth. •
Resources include
water, soil, metallic and
Page 34/37

nonmetallic minerals, and energy. Renewable resources can be replenished over relatively short time spans. • Plants, animals, and energy such as water, wind, and the sun are some examples of renewable resources.

Chapter 1 Introduction to Earth Science
Page 35/37

Environmental science is a quantitative ntal discipline with both applied and theoretical aspects and has been influential in informing the policies of governments around the world. Environmental science is considered separate from environmental studies. which emphasizes the human relationship with Page 36/37

the environment and the social and political dimensions thereof.
