This is made up of. the list number or build list, typically 2 to 4 letters followed by 4 or 5 numbers; a letter identifying the country; a series of numbers showing the build line, also called a serial number

Identify Your Engine | Perkins

The number 24584-75 cast into the casing suggests the casting design originates in 1975, although that won't be its finished part number. From the stamped number 779-079-070 we can deduce from this website that the engine is an XL1000, made in 1979.

Identifying engine year and size from engine case number—

Beginning in 1981, Harley started using a 17 digit VIN number on the frame and an abbreviated VIN on the engine case. As always, the legal title must match the VIN number on the frame. If the title and frame VIN reads 1HD1ELK12BZ123456, the engine case number should read something like ELKB123456.

Harley VIN Identification | Harley Performance

HD VIN Number Decoder. Although the Harley Davidson VIN number decoder provides the results in a few seconds, let's consider a few symbols from the code and their meaning. The first three characters always identify the manufacturer of the bike. The typical beginning of the code can be 1HD where 1 stands for the USA and HD stands for Harley Davidson. It seems that you don't need the decoder after you cope with the first symbols.
