Human rights and health - World Health Organization

A human rights-based approach (HRBA) to health focuses attention and provides strategies and solutions to redress inequalities, discriminatory practices (both real and perceived) and unjust power relations, which are often at the heart of inequitable health outcomes. It defines health as a "right" rather than an entitlement or "need".

WHO | Human rights - World Health Organization

Our work on human rights in health and social care aims to help the English health and social care sector comply with the Human Rights Act, through: increased knowledge, understanding and ability to meet duties to respect, protect and promote human rights, including by addressing inequalities; increased knowledge, understanding and ability to translate human rights concepts and protections into higher quality service design and delivery

Health | Human Rights Watch

When must public authorities respect your human rights? Public authorities must respect your human rights when they provide you with health or care services - for example, when you're in hospital or when social services assess your care needs. They must also respect your human rights when they commission and plan services - for example, when a local authority contracts with a private organisation to provide care services. Next steps

Protecting your human rights when using health and care ...

Recently, Public Health Reviews has published a special collection on human rights in patient care, which explores various aspects of human rights in patient care, including balancing with public health and bioethics, state responsibility in private health facilities, palliative care, and reproductive health, as well as dimensions relevant to particular populations, including Roma, people who use drugs, and transgender persons.

Human Rights in Patient Care - health rights

The right to health is the economic, social, and cultural right to a universal minimum standard of health to which all individuals are entitled. The concept of a right to health has been enumerated in international agreements which include the Universal Declaration of Human Rights, International Covenant on Economic, Social and Cultural Rights, and the Convention on the Rights of Persons with Disabilities. There is debate on the interpretation and application of the right to health due to consid

Right to health - Wikipedia

The shared goal of public health policies and human rights is to prevent transmission of HIV and thereby improve health for all in general, while at the same time ensuring the respect of human rights and dignity of those already infected and needing treatment.

Health and human rights in prisons - ICRC

Health and Human Rights in a Changing World is a comprehensive and contemporary collection of readings and original material examining health and human rights from a global perspective.
