Online Library

Health

Essentially what underlies this debate are the key characteristics of health promotion itself: that it is by definition a process; that it acts on individuals, communities, organisations and society; to be effective it uses multiple methods and is responsive to the needs of the target audience; that it is

Online Library

Health

concerned with change which will usually occur over long periods of time; that this renders its outcomes problematic to define, measure and to attribute to interventions; that in short it ...

Evaluation of health promotion, public health or public ...

Professionals in health

Online Library Health

promotion focus on its effectiveness and efficiency and acceptability .

Increasingly, concepts such as empowerment of individuals, communities or larger populations are taken into account when assessing the quality and outcomes of health promotion programmes. It could be argued,

Online Library

Health

however, that evaluation has been less useful in enabling individuals and teams working in health promotion to examine their own unique contribution to practice.

Reflection—a neglected art in health

promotion | Health ...

Health promotion may be viewed as a global strategy which

Online Library Health

incorporates health education. Health education is defined operationally as: ‘.... any intentional activity which is designed to achieve health or illness related learning, ie, some relatively permanent change in an individual’s capability or disposition.
