Highway and Urban Environment | SpringerLink Roads can have both positive and negative influences on people and the environment. On the positive side roads provide the opportunity of mobility and transport for people and goods. On the negative side roads occupy land resources and form barriers to animals. They can also cause adverse impacts on natural water resources and discharge areas.

4. Environmental issues related to road management ... General provisions for highway projects, applicable to all disciplines contained in this document set. Sustainability & Environment Environmental assessment and design requirements for the delivery of motorways and all-purpose trunk road projects. Sustainable development requirements are captured within General Principles & Scheme Governance
