One admirable attempt to fill this chasm is the wonderfully idiosyncratic Historical Atlas of Crystallography published by the International Union of Crystallography (Lima-de-Faria, 1990). It is a treasure of timelines, portraits of crystallographers, and fetishistic reproductions of cover pages of classic monographs, accompanied by revealing essays on various aspects of the history of crystallography by acknowledged experts.

At the same time, José developed a strong interest in the history of crystallography and edited the well known Historical Atlas of Crystallography (Springer Netherlands, Dordrecht 1990). In fact, he was firmly convinced that the teaching of science improves with the simultaneous teaching of its history because scientific discoveries are often the result of the accumulation of several advances ...
