Note: This is Part 1 of a 6-part series on the 6th World Symposium on PH. Part 1 | Part 2 | Part 3 | Part 4 | Part 5 | Part 6 (Coming Soon!). The 6th World Symposium on Pulmonary Hypertension proposed some fundamental changes to the hemodynamic and clinical classification of pulmonary hypertension (PH).

The 6th World Symposium on PH: Hemodynamic Definitions and—

The recent publication in the European Respiratory Journal of the proceedings of the 6th World Symposium on Pulmonary Hypertension (WSPH) is an important milestone in pulmonary vascular medicine. Since the first WHO meeting on primary pulmonary hypertension in Geneva in October, 1973, these World Symposia have taken place in Evian (France, 1998), Venice (Italy, 2003), Dana Point (USA, 2008), and twice in Nice (France, 2013, and 2018).

An insider view on the World Symposium on Pulmonary—

Since 1973 the World Symposia on Pulmonary Hypertension (WSPH) proceedings have summarised the scientific advances and future needs in this field through the efforts of multiple task forces, each focusing on a different aspect of pulmonary hypertension (PH) . The 6th WSPH comprised 124 experts, divided into 13 task forces, that began their work in January 2017 and presented their consensus opinions to an audience of 1376 participant attendees between February 27 and March 1, 2018 in Nice ...

World Symposium on Pulmonary Hypertension. Marc Humbert, Nazzareno Galie European Respiratory Journal 2019; 53: 19E5301; DOI: 10.1183/13993003.E5301-2019. Editorial An overview of the 6th World Symposium on Pulmonary Hypertension. Nazzareno Galie, Vallerie V. McLaughlin, Lewis J. Rubin, Gerald Simonneau

Proceedings of the 6th World Symposium on Pulmonary—

Pulmonary hypertension (PH) is a chronic, complex and challenging disease. Advances in treatment are for the subset of patients with pulmonary arterial hypertension. Selected review of the literature was conducted incorporating the European Society of Cardiology/European Respiratory Society 2015 guidelines and recommendations from the Sixth World Symposium on Pulmonary Hypertension.

Clinical update on pulmonary hypertension+ Journal of—

The 12th Annual Research Triangle PH symposium will reinforce the current diagnostic and management guidelines of PAH put forth by the 6th World Symposium on Pulmonary Hypertension in 2018, as well as updates from subsequent national and international conferences. In addition, there will be a focus on the different subgroups of Pulmonary Hypertension, covering the diagnosis, management, and treatment for patients with WHO group 2-5 PH.

12th Annual North Carolina Research Triangle Pulmonary—

WORLDSymposium, in consideration of the ongoing uncertainty surrounding the COVID-19 pandemic, announces that it will transition the 2021 Annual Scientific Meeting, scheduled for February 8-12, 2021, to an entirely virtual meeting. The health and safety of attendees, faculty, sponsors and staff remains the primary concern of the WORLDSymposium.

MRI Prediction of Precapillary Pulmonary Hypertension according to the Sixth World Symposium on Pulmonary Hypertension. Andrew J. Whitfield *, Roshni Solanki *, Christopher S. Johns †, David Kiely †, Jim Wild ‡, Andrew J. Swift ‡

MRI Prediction of Precapillary Pulmonary Hypertension—

At the recent 6th World Symposium on Pulmonary Hypertension (PH), the definition of PH was redefined to include lower pulmonary artery pressures in the setting of elevated pulmonary vascular resistance (PVR). However, the relevance of this change to subjects with PH due to left-heart disease as well as the preoperative assessment of heart transplant (HT) recipients is unknown.

Impact of the New Pulmonary Hypertension—CHEST Home

WVU Medicine is proud to host the first annual John E. Parker WVU Pulmonary and Sleep Symposium hosted by the WVU Department of Medicine, Section of Pulmonary, Critical Care and Sleep.
