The F20B engine is basically a destrocked version of the H22 at 2liters. Much higher compression somewhere around 11-11.5:1. The engine was built by Honda to compete with the Accord in a 2.0 liter race class that required the donor car/engine to be from a production car. Hence Honda put the engine in the Accords and sold a limited number of them as SiR-T models. The engine has a redline of ...
