How to make your own (no template) personal website with React, Material UI, and Netlify ... I wanted to use Netlify because, again, chance to use something new, and I remember reading this post and thought Netlify seemed cool and fast. Again, my site is so small, it might not matter. But it does seem faster than GH Pages even on this small scale.

How to make your own (no template) personal website with ...

One thing to take note of with Netlify's solution is this only works this "simply" for static HTML pages. If your page uses JavaScript to manage the content of that page, such as not adding a form until after the page loads, you'll need to check out Netlify's documentation on how you can make this work with an additional form attribute.

How to Create a Contact Form with Netlify Forms and Next.js

Now it's time to sit back and relax. You did your part; let Netlify take care of the rest. It'll only take a minute. Step 7: All Done. Once the build completes, your site is live! Head to the overview and you can see the URL of your newly published site. Netlify automatically generated a name for your site.

A Step-by-Step Guide: Deploying on Netlify | Netlify

On the Website Settings screen, make a note of the Netlify URL for your site which you can see in the boxout with the format https://siteName.netlify.com; we'll need this for the Publii settings. Now scroll further down the page to the Site Info section; make a note of the API ID , which will be a string of characters and numbers as in the below example, as we'll also need it when configuring ...
