What is Information Extraction? | Using  
Ontotext Fundamentals  
An overview of the proposed  
information extraction scheme is  
shown in Figure 2. Overall, the  
scheme includes 4 parts, that is, traffic  
collection, data preprocessing, smart  
devices information extraction, and

# Access Free Information Extraction A Smart

smart devices information record (SDIR). Traffic collection is to collect raw data traffic from the targeted network. Traffic collection points can be deployed in different locations of a communication network, such as the core network, aggregation layer, remote server-based access ...
