Delivering better integrated care - GOV.UK

Integrated care Local partnerships to improve health and care NHS organisations and local councils in England are joining forces to coordinate services around the whole needs of each person. Their aim is that people can live healthier lives and get the care and treatment they need, in the right place, at the right time.

NHS England » Integrated care

Integrated Care is a way of coordinating health and social care services to make sure they are based closely around people's needs. It is aimed particularly at those with complex and long-term health problems.

Integrated care and support services | Age UK

Integrated Care - Integrated care, also known as integrated health, coordinated care, comprehensive care, seamless care, or transmural care, is a worldwide trend in health care reforms and new organisational arrangements focusing on more coordinated and integrated forms of care provision.

Integrated care | Health Education England

The WHO Integrated Care for Older People (ICOPE) package of tools offers an approach that helps key stakeholders in health and social care to understand, design, and implement a person-centred and coordinated model of care.

WHO | Integrated Care for Older People

The Framework on integrated people-centred health services is a call for a fundamental shift in the way health services are funded, managed and delivered. It supports countries progress towards universal health coverage by shifting away from health systems designed around diseases and health institutions towards health systems designed for people.

WHO | WHO Framework on integrated people-centred health

...

Understanding how integrated care systems are supporting children and young people. The health of children and young people is determined by far more than healthcare. Household income, education, housing, a stable and loving family life and a healthy environment all significantly influence young people's health and life chances.

Integrated care in action – children and young people

Models of integrated care may enhance patient satisfaction, increase perceived quality of care, and enable access to services, although the evidence for other outcomes including service costs remains unclear. Indications of improved access may have important implications for services struggling to cope with increasing demand.
