International Trade Theory and Policy. International trade is a central component of every industrialised nation ' s economic activity, bringing gains to producers from more efficient resource and access to larger markets while benefitting consumers through increased choice of products at lower prices. This class seeks to provide an understanding of the economic mechanisms that bring about these gains from trade.

International Trade Theory and Policy | Giancarlo Gandolfo ...

International trade theory is a sub-field of economics which analyzes the patterns of international trade, its origins, and its welfare implications. International trade policy has been highly controversial since the 18th century. International trade theory and economics itself have developed as means to evaluate the effects of trade policies.
