Introduction to Computational Learning Theory (COMP SCI 639) Spring 2020 This course will focus on developing the core concepts and techniques of computational learning theory. We will examine the inherent abilities and limitations of learning algorithms in well-defined learning models.

Introduction to Computational Learning Theory (COMP SCI 639)
Computational Learning Theory Computational learning theory, or CoLT for short, is a field of study concerned with the use of formal mathematical methods applied to learning systems. It seeks to use the tools of theoretical computer science to quantify learning problems. This includes characterizing the difficulty of learning specific tasks.

A Gentle Introduction to Computational Learning Theory ...
Computational learning theory is a new and rapidly expanding area of research that examines formal models of induction with the goals of discovering the common methods underlying efficient learning algorithms and identifying the computational impediments to learning.

The requirements of the course are as follows: Biweekly problem sets (70% of grade). Your solutions must be typed and prepared as LaTeX documents (instructions will be given on how to use LaTeX.) ... Midterm evaluation (10% of grade). Details TBA, but the midterm will be on October 18. In-class ...

The first part of the course will closely follow portions of An Introduction to Computational Learning Theory, by M. Kearns and U. Vazirani (MIT Press). We will cover perhaps 6 or 7 of the chapters in K&V over (approximately) the first half of the course, often supplementing with additional readings and materials.

Computational Learning Theory

Data science is an inter-disciplinary field that uses scientific methods, processes, algorithms and systems to extract knowledge and insights from many structural and unstructured data. Data science is related to data mining, machine learning and big data.. Data science is a "concept to unify statistics, data analysis and their related methods" in order to "understand and analyze actual ...
