This can be achieved by constructing an Astable multivibrator which produces a square wave at 50Hz. In the circuit, R1, R2, R3, R4, C1, C2, T2 and T3 form the oscillator. Each transistor produces inverting square waves. The values of R1, R2 and C1 (R4, R3 and C2 are identical) will decide the frequency.

How to make Solar Inverter Circuit

If you are using a transformer with a 1:20 ratio and 120V as output, then 6V is the voltage to use. Usually, however, you want to use a multiple of 12, because the large batteries that provide very good power, are 12V batteries. Therefore, if you are using voltage to power the inverter circuit, you want to use 12V or 24V ideally.
