In ITIL maturity model assessment consists of a questionnaire about the demographics, attributes, inputs, interfaces, and outputs related to ITIL processes and functions. The maturity level of each process and function is then determined according to the following five levels. Level 1: Initial

Maturity Models for ITIL Processes and Functions – BMC Blogs

plement ITIL successfully, an organization must use a maturity model. A maturity model de-fines different maturity levels and the higher up on the maturity scale an IT organization is, the better it performs. Defining an IT organization's maturity compared to best-practice like ITIL, the maturity indicates how much of ITIL to implement, and where to start. Thus, as-

IT maturity self-assessment - Lu

The PinkScan™ was roughly based on the Carnegie-Mellon inspired Software Capability Maturity Model. Soon many others developed similar models. The Pinkscan categories form a general outline of increasingly more sophisticated processes. There use of the PinkScan is described in their booklet "ITIL® Process Maturity, Self-Assessment & Action Plan". Each process is assessed as being in one of the five stages of maturity:

ITIL Assessment Framework

Information Technology Infra-structure Library (ITIL) is the most popular "best practices" framework for managing Information Technology (IT) services. However, implementing ITIL not only is very difficult but there also are no best practices for

(PDF) ITIL maturity model | Ruben Pereira - Academia.edu
