The Kakutani fixed point theorem can be used to prove the minimax theorem in the theory of zero-sum games. This application was specifically discussed by Kakutani's original paper. Mathematician John Nash used the Kakutani fixed point theorem to prove a major result in game theory. Stated informally, the theorem implies the existence of a Nash equilibrium in every finite game with mixed ...

Kakutani fixed-point theorem - Wikipedia The form of the theorem proved by Kakutani was: If x (x) is an upper semi-continuous point-to-set mapping of an r-dimensional closed simplex S into its power set P(S), then there exists x 0 S such that x 0 (x 0). The general scheme of Kakutani's proof may be seen from the one dimensional case.

Shizuo Kakutani's Fixed Point Theorem KAKUTANI 'S FIXED POINT THEOREM Theorem: Let X Rnbe closed, bounded, and convex. For every x X let F(x) be a non-empty, convex subset of X. Assume that the graph of the setvalued functions is closed in X × X. Then there exists a point x? X such that x? F(x).

In mathematical analysis, the Kakutani fixed-point theorem is a fixed-point theorem for setvalued functions. It provides sufficient conditions for a set-valued function defined on a convex, compact subset of a Euclidean space to have a fixed point, i.e. a point which is mapped to a set containing it.

Kakutani's fixed point theorem | Project Gutenberg Self ... Kakutani's fixed point theorem is classically equivalent to Brouwer's fixed point theorem. The constructive proof of (an approximate) Brouwer's fixed point theorem relies on a finite combinatorial argument; consequently we must restrict our attention to uniformly continuous functions.

[1611.02531] Kakutani's fixed point theorem in ... Kakutani 's Fixed Point Theorem is a powerful generalization of Brouwer 's Fixed Point Theorem. It has several deep and important corollaries in economics, which include: the Arrow-Debreu theorem, which proves the existence of a general equilibrium of an economy under certain assumptions.

Kakutani 's Fixed Point Theorem | Alexander Adam Azzam In mathematics, the Markov–Kakutani fixed-point theorem, named after Andrey Markov and Shizuo Kakutani, states that a commuting family of continuous affine self-mappings of a compact convex subset in a locally convex topological vector space has a common fixed point.

Markov–Kakutani fixed-point theorem - Wikipedia Kakutani 's Fixed Point Theorem Theorem 3. (Thm. 3.4 '. Kakutani 's Fixed Point Theorem) Let X R n be a non-empty, compact, convex set and : X 2 X be an upper hemicontinuous correspondence with non-empty, convex, compact values. Then has a fixed point in X. Proof. (sketch) Here, the idea is to use Brouwer 's theorem after appropriately approximating the correspondence with a function.

A., Abstract and Applied Analysis, 2012 such that for each x / in X, the set f(x) is non-empty, closed and convex.

Kakutani theorem - Encyclopedia of Mathematics Section 5.3. Fixed Point Theorems: Brouwer's and Kakutani's We have already studied fixed points for the very special case of contraction mappings. Here we study them for general functions as well as for correspondences. Definition 1 Let X be a nonempty set and f : X X. A point x X is a fixed point of f if f(x) = x.

Economics 204 Summer/Fall 2011 Section 5.3. Fixed Point ... The following, Kakutani's fixed-point theorem for correspondences (Th. 1.10.2 in Debreu, 1959), can be derived from Brouwer's Fixed Point Theorem via a continuous selection argument.

HET: Fixed-Point Theorems Kakutani's fixed-point theorem is quite similar to Brouwer's fixed point theorem - the main difference is that Brouwer speaks about single-valued functions and Brouwer about multivalued functions. There is a way to go from multi-valued functions to single-valued ones - it is Michael's selection theorem.

Reducing Kakutani's fixed-point theorem to Brouwer's using ...

In order to apply the Kakutani fixed point theorem to G, we must show that G is upper semicontinuous. Since S" ' is compact, we will show that the graph of G is closed. Let (y, z) be a point in S" ' x S"' ' which does not lie on the graph of G, i.e., $z^G(y)$. Then there exists an open neighborhood V of z in S"~1 which is disjoint from G (y).

Kakutani 's Fixed Point Theorem Kakutani 's xed point theorem generalizes Brouwer 's xed point theorem in two aspects. A point-to-point mapping is generalized to point-to-set mapping, and continuous mapping is generalized to upper semi-continuous mapping. Denition 2.1.

KAKUTANI 'S FIXED POINT THEOREM AND THE MINIMAX THEOREM IN ... Kakutani's fixed point theorem guarantees the existence of a fixed point if the following four conditions are satisfied. is compact, convex, and nonempty. is nonempty.
