posted by John Spacey, April 17, 2019. A knowledge audit is an assessment of knowledge management practices and culture. Historically, knowledge audits viewed knowledge as an asset and audits resembled an inventory audit. Modern knowledge audits are based on the idea that knowledge is only valuable when it is used.

A knowledge audit is especially useful before a knowledge strategy is developed or when new investments in KM are planned. It helps to identify areas of high knowledge leverage and the prioritization of plans. It can also provide a baseline for ongoing assessment of knowledge quality and KM effectiveness, typically on an annual or bi-annual basis.
