On the Retina Ib, Ilc, IIlc the frame counter is reset by moving the frame counter forward by repeatedly pushing the chrome button on the back of the top housing in the direction of the arrow while holding the film release button down. When these cameras were the current models, films came in either 36-shot or 20-shot lengths.

f/2 Heligon or Xenon lens in place of the f/2.8 found on the Retina IIc, plus an uncoupled light meter. Retina IIc with the Rodenstock Heligon lens are more commonly found in Europe and hardly ever in the USA, so it is likely that exports to the States were limited to those brought back by returning servicemen.

Kodak Retina IIIC (type 028)
Manufactured from 1957 to 1960, this model was the pinnacle of Kodak's folding Retina range. An update of the Retina IIc, it had an improved viewfinder with framelines for the wide-angle, standard, and telephoto lenses. The Retina IIIC also had the same single-range exposure meter as the Retina Reflex.

Kodak Retina IIIC ("big C") ... The exposure meter no longer has a flip-up lid giving a dual range, but neither did the last production of the IIc. The leatherette has a slightly different, less "pebbled" look than in previous cameras, and the meter dial is simpler. Towards the end of production (1961), sales of these cameras undoubtedly slumped, due in part to the arrival of the two rigid ...
