...

Answer Key: Part I: 1. Take a look at the two pictures above. What do you notice about the global wind and surface current patterns? In general, the direction of the wind flows in the same direction as the ocean surface currents. 2. The global winds in the first map generally travel in either a clockwise or counterclockwise direction. Look at

defined by precipitation and temperature; and

## Lab 4: Climate Patterns and Life

The pattern most associated with the temperature difference is land-water contrasts. Land heats and cools faster and more intensely than water. With Oakland next to the Pacific Ocean and St. Louis centralized on land in the Continental United States, this answer makes more sense.

## Temperature Pattern Exercise Free Essay Example

### FACTORS CONTROLLING AIR TEMPERATURE PATTERNS.

We have already met the three main factors that explain world isotherm patterns. The first is latitude. As latitude increases, average annual insolation decreases, and so temperatures decrease as well, making the poles colder than the Equator. Latitude also affects seasonal temperature variation.
