In the case of health care there is also a longstanding distinction between leadership in the person of the chief executive (or his or her directors) and team or clinical leadership in the persons of uniprofessional groups such as doctors or nurses and multidisciplinary teams which are the face of care of which the patient is most aware.

*Leadership and the quality of care | BMJ Quality & Safety*

Leadership in the health care sector is spread across management and clinical workforces, creating peculiar challenges. The chapter examines the concept of leadership in the health care sector within the context of the recent drive by health care organisations to identify essential competencies and training required by health management and leadership workforces for effective performance in roles.

Healthcare organizations thrive on data, and can use it to help manage change. Data can support the vision set by leadership, and help employees understand why change is necessary, experts say. The switch to value-based care is a good example, says Ted Chan, Founder and CEO of CareDash.com, an online healthcare portal. "This is incredibly difficult, and even if a proposed functional model can be put down on paper or into a spreadsheet, the change management necessary to get physicians and ...
