The four (4) subsystems which
are most utilized by a Lotus
Domino server are: CPU Memory
Disk I/O Network I/O Many
reference materials tend to
combine disk and network I/O into
one category. Because different
tools and techniques are used to
monitor and change these
resources, they will be discussed

DB2 Learning Guide. Lotus Domino 7 introduces the ability to use IBM's DB2 relational database as an alternative storage mechanism for Domino data. However, IBM recently announced that it is looking for more feedback from customers, and that support for the Domino DB2 capability will be held back until an upcoming maintenance release of Domino 7 (January has been mentioned as a timeframe).
