## **Lymphatic System and Immunity- Answers and Question ...**

The functions of the lymphatic system are: Fluid balance. The lymphatic vessels transport back to the blood fluids that have escaped from the blood vascular system. About 30 liters (L) of fluid pass from the blood capillaries into the interstitial spaces each day, whereas only 27 L pass from the interstitial spaces back into the blood capillaries.

Nodes. encapsulated and more organized than nodules. Nodules. un-encapsulated aggregations of lymphatic tissue.

## Study Guide 5 Lymphatic System Flashcards | Quizlet

An overview of the lymphatic system [http://www.as.wvu.edu/~sraylman/physiology/human\\_lymphatic.swf](http://www.as.wvu.edu/~sraylman/physiology/human_lymphatic.swf)  
1. What is lymph? excess tissue fluid carried by lymphatic vessels  
2. Where does it come from (production)? Lymph is a clear fluid found in between cells. It carries immune cells, some proteins and other nutrients to the tissues.  
3.

## Study Guide Answer Key Animations: 1. 2.

1. MHC complex helps immune system recognize self from nonself. If MHC does not match, your body will attack the cells. In order for your body to not attack the donated organ or blood transfusion, you will use a drug to dampen your own immune system. This would be a negative effect because you will be more prone to infections and getting sick.  
2.
