Let's take the G major scale: G - A - B - C - D - E - F#. The G major triad would be G - B - D. Minor Triads: Minor triads are constructed in the same fashion as major triads, only based off the minor scale. Take the 1st, 3rd, and 5th notes of the scale and you end up with the minor triad. Augmented Triads:

Constructing Major, Minor, Augmented and Diminished Triads ...

The logic is the same as we saw for the denominations "major" and "minor". The denomination "augmented" indicates a longer interval and "diminished" indicates a shorter interval. "Perfect" is in the middle between these two. But couldn't we just use the names "major" and "minor" for all the notes instead of using "diminished", "augmented" and "perfect"? Yes, we could. So why are there other denominations? In the more advanced topics you will ...
