Marijuana Grower's Handbook: Your Complete Guide for ...

When you 're growing indoors, you play that role. Controlling the climate involves regulating the temperature, humidity, and airflow. Ideal conditions vary according to the growth stage: Germination: During germination, seeds need to be kept warm and moist in the dark. You can start seeds in dampened soil plugs in a mini greenhouse (available at most hardware stores).

This guide highlights the most critical parts of setting up an indoor marijuana grow before you germinate, plant and start caring for your seeds. For more information about growing from seed to harvest, check out our website! You 'Il find tons of useful information. Step 1: Choose An Area to Grow Marijuana Indoors

How To Grow Marijuana Indoors in Five Simple Steps

Starting Your First Cannabis Plants There are two ways to begin a cannabis grow — either with seeds or clones — and it 's important to consider the benefits and draw-backs of both before beginning the cultivation journey. For example, while clones may reduce cultivation time, seeds are less likely to contaminate a grow area.
