Although simple, the requirements review is highly valuable. The process is typically a manual one, but using automation, such as QVscribe, both during initial authoring and during the review can streamline it significantly. For example, companies like RCAF used QVscribe to ensure requirements had at least a 4 out of 5 quality score before submitting them for review, reducing review time by over 50%.

Interview and Book Excerpt: Mastering the Requirements Process

Understanding a problem - the real problem - is the role of the requirements process. This course presents a comprehensive process for uncovering, testing and recording real requirements. Requirements discovery is no longer about producing large, unreadable (and often unread) specifications. Requirements are about uncovering the real needs of the problem space, understanding the needs of the people who use your solution, recognising the environment for the solution, then, in a timely ...
