E = 1, since the sum of two 2-digit numbers is less than 200. This means that the tens digits must add up to 10 (or 9 plus a carry from the ones column). There are 4 cases for the tens column: 6 and 5 plus a carry, because F and E cannot both be 1; 6 and 4; 6 and 3 plus a carry; and 5 and 4 plus a carry.

Division E (grades 4-6) Division M (grades 6-8) If a ... younger students can easily become afraid of math, rather than excited by it; dates: Contests will be posted one week prior to the scheduled Olympiad date. ... Contests consist of five nonroutine problems and has a time limit of 30 min. Every problem requires careful mathematical thinking

~~About Our Contests - Math Olympiads for Elementary and~~ ...  
the ten-thousands place with the least remaining unused digits. Since E repeats in the tens place, assign E = 0. Then assign 2, 3, and 4 to I, A, and U in some order. As a result, the next least available digits for T and R are 5 and 6, respectively. Therefore, the least possible sum is 512,024. 45 7 6 1 2 3 1 2 3 105506 125506 135506 + 145506
