Mazda D5 Timing - wpbunker.com

i have plenty of FE and F2 series service books but this D5 was usually not that common unless ordered special. It was not quite as popular as the FE or F2's. Between these 3 engine models the D5 is the only one with a timing chain and not a belt like the others.

Timing Marks?. Discussion about troubleshooting Yale ...

having to assemble a yale/mazda d5 engine that I did not start. Lower end and pistons are already together. Have torque specs from SMH. need timing chain alignment and head torque sequence. Looks like the timing chain may be set with the crank keyway straight up and the dot on the cam pulley also straight up. Most of the engine should be easy enough.

Re: help me with my d5 mazda please i am stuck #2 Post by thelevman » Mon Dec 27, 2010  
7:09 pm im not familiar with the engine at all but there has to be some sort of tensioner on  
the chain, so its not loose, you loosen this off and the chain will go slack so you can get the  
chain off the cam sprockets and lift the head off

help me with my d5 mazda please i am stuck - AusRotary

Mazda TSB #01-012/12 covers the diagnostics and procedures well; the problem is the lock  
pin on the actuator is damaged, allowing uncontrolled movement of the components. The  
TSB covers how to replace the actuator pulley without replacing the timing chain and refers  
you to the service manual if the chain needs to be replaced.

MAZDA: Engine Timing Belt, Chain Replacement: Crankshaft

I need the timing specs for a Yale forklift with a mazda 2.0 motor. i took the head off of the  
forklift because the head was cracked, made sure to mark the belt and top pulley. I sent it in  
for repair, the machine shop took the pulley off for repairing the the head, now i have no  
mark and 4 different ways to put the pully on.

The camshafts are driven by a link grounding type chain automatically tensioned using the engine oil pressure and the spring (the timing chain is maintenance-free). The head has the 39 degrees angle between the intake and the exhaust valves. There are solid bucket tappets, and the valve gaps need adjustment periodically.

OHC in line 4 cylinder long block engine assembly with aluminum cylinder head including valve cover, front timing covers, oil pan and front crank pully. This spec engine does not accommodate crank driven hydraulic pump. To ID this engine the top timing cover will have a '2.0' in raised letters that is hard to see as it is behind the water pump.
