A mean reversion trading strategy involves betting that prices will revert back towards the mean or average. Momentum predicts prices will continue in the same direction. Markets are forever moving in and out of phases of mean reversion and momentum. Therefore it's possible to develop strategies for both phases.

How To Build A Mean Reversion Trading Strategy

Thank you so much! I am really enjoying Mean Reversion Trading Systems and Quantitative Trading Systems, and am reading, studying, and applying it every night after work. I know it will take time, but your books make the road easier. I'm so glad you wrote this new book as well.

Mean Reversion Trading System: Practical Methods for Swing ...

Almost every trading strategy aims to exploit one of two prevailing phenomena in financial markets: mean reversion or momentum. In a nutshell, mean reversion strategies assume big moves will partly reverse, while momentum strategies assume big moves will continue in the same direction. This article will explain the phenomenon of mean reversion in stock prices.

Mean Reversion Trading - Marketplace Checkout | Seeking Alpha

- Psychological factors can make Reversion to Mean Strategies hard to trade. You are consistently trading against a powerful emotional short term market. Counter: Make smaller trades than you normally would.
- Risk Management can be harder with RTM Strategies as many signals tend to occur all at once during market downturns.

Finding a Statistical Edge with Mean Reversion Trading

Trading For Yield - Swing Trading System A simple mean reversion system based on US treasury yields that that shows a win rate of over 75% and a profit factor over 3 in historical simulations.

Marwood Research | Marwood Research

The study and application of mean reversion as a trading tool is best suited to the four hour and daily time frames. That isn't to say that other time frames don't have a mean, as they most certainly do. However, in my experience, these two time frames are the most reliable when using mean reversion to identify buying or selling opportunities.

Mean Reversion: A Guide to Market Timing | Daily Price Action

Mean reversion systems are looking for markets that are unusually high or low and will eventually return back to the mean. We want a system that looks at a particular market with a significant deviation from their average. The first step to come up with a good trading idea that we can test is to observe the price chart on different time frames.
