reusable instruments and medical devices every year. Soon they will be performing this vital task in a completely redesigned and expanded space but first thing's first: construction must take place!

*The future of medical device reprocessing at Mount Sinai ...*

Medical device reprocessing is the process of cleaning, remanufacturing and disinfection of the medical devices so that those devices can be reused or to be put in service again. The reprocessed devices are biopsy, catheter, endoscope and pulse oximeter. By using on patients, reusable devices become soiled and contaminated with microorganisms.
