Architecting Cloud Native .NET Applications for Azure. 11/10/2020; 2 minutes to read ... Refer changelog for the book updates and community contributions. PUBLISHED BY. Microsoft Developer Division, .NET, and Visual Studio product teams. A division of Microsoft Corporation ... This guide begins by defining cloud native and introducing a ...

*Architecting Cloud Native .NET Applications for Azure ...*

Architecting Microsoft Azure Solutions Description - hidden in CSS In this online course, you will learn about architecting solutions on Microsoft Azure that involve the use of virtualization, automation, networking, storage, identity, security, data platform, and application infrastructure.

*Architecting Microsoft Azure Solutions*

Traditional .NET applications can and do support many of these requirements, but ASP.NET Core and .NET 5 have been optimized to offer improved support for the above scenarios. More and more organizations are choosing to host their web applications in the cloud using services like Microsoft Azure.

*Architect Modern Web Applications ... - docs.microsoft.com*

Modernizing existing .NET apps e-book. Learn how to move your existing .NET Framework server applications directly to the cloud by modernizing specific areas, without re-architecting or recoding

entire applications. Download PDF; View on the web

### *.NET & Azure cloud application architecture guidance*

A successful cloud application will focus on five pillars of software quality: Cost optimization, Operational excellence, Performance efficiency, Reliability, and Security. Leverage the Microsoft Azure Well-Architected Framework to assess your architecture across these five pillars. Next steps

### *Azure Application Architecture Guide - docs.microsoft.com*

The eShopOnContainers application is an open-source reference app for .NET Core and microservices that is designed to be deployed using Docker containers. The application consists of multiple subsystems, including several e-store UI front-ends (a Web MVC app, a Web SPA, and a native mobile app).

### *.NET Microservices. Architecture for Containerized .NET ...*

Learn how to architect distributed cloud applications with the correct developer mindset using the right technologies and the best cloud patterns. This technology-agnostic course begins by explaining the benefits of distributed cloud applications with an emphasis on maintaining high-availability and scalability in a cost-effective way while also dealing with inevitable hardware and software ...

### *Architecting Distributed Cloud Applications (free video ...*

Enterprise applications can be complex and are often composed of multiple services instead of a single service-based application. For those cases, you need to understand additional architectural approaches, such as the microservices and certain Domain-Driven Design (DDD) patterns plus container orchestration concepts.

### *Architecting container and microservice-based applications ...*

Build production-ready cloud applications for scalability, security, resiliency, and more using Azure. ASP.NET apps Quickly build, test, and deploy data-driven web applications using the ASP.NET web framework.

Microsoft .NET: Architecting Applications for the Enterprise by. Dino Esposito, Andrea Saltarello. really liked it 4.00 · Rating details · 216 ratings · 8 reviews Make the right architectural decisions up front and improve the quality and reliability of your results. Led by two enterprise programming experts, you'll learn how to apply the ...

### *Microsoft .NET: Architecting Applications for the ...*

Are you new to Architecting .NET Applications? Make sure to read this guide. Application Architecture – Getting started. Decoupling application code from UI. Loose coupling is a key property of well-architected applications. When dealing with the user interface, this means that no application code must directly depend on the user interface.

### *Architecting .NET Desktop and Mobile applications ...*

Discover the exciting improvements we're bringing to help you architect and deploy an intelligent intranet with SharePoint. From simplifying way-finding for users across all of SharePoint including global navigation, to organizing your intranet with hubs, to unlocking new branding capabilities, and establishing sites with consistent structure and functionality.

### *Architecting your intelligent intranet with SharePoint ...*

In this session we will start with a modern app and optimize it for Kubernetes using Azure Kubernetes Service (AKS). In addition to migrating to AKS, we will take advantage of native Azure services like Cosmos DB API for MongoDB (in the process comparing options like running Dockerized MongoDB or hosted MongoDB Atlas).

### *Architecting Cloud-Native Apps with AKS and Cosmos DB*

Azure BiteSize: Architecting Applications for Azure Stack Building applications for the Intelligent edge on Microsoft Azure Stack. In this session we will cover the Azure Stack hybrid cloud proposition and the approaches for building and deploying applications that move the intelligent cloud closer.
