Mouse Genetics (One Trait) You need a modern browser or flash to view this video. Breed "pure" mice with known genotypes that exhibit specific fur colors, and learn how traits are passed on via dominant and recessive genes. Mice can be stored in cages for future breeding, and the statistics of fur color are reported every time a pair of mice breed.

Mouse Genetics (One Trait) Gizmo : ExploreLearning

Mouse Genetics (One Trait) Launch Gizmo. Breed "pure" mice with known genotypes that exhibit specific fur colors, and learn how traits are passed on via dominant and recessive genes. Mice can be stored in cages for future breeding, and the statistics of fur color are reported every time a pair of mice breed.

Mouse Genetics (One Trait) Gizmo : Lesson Info ...

Gizmo of the Week: Mouse Genetics (One Trait) by Laura Gallagher July 17, 2017. Gregor Mendel is famous for his studies of heredity in pea plants, but he actually began his experiments with mice. After breeding mice in his rooms at the monastery, Mendel had to switch to plants because the bishop disapproved of a study having to do with animal sex. Students can recreate what Mendel ' s mice experiments might have looked like with the Mouse Genetics (One Trait) Gizmo.

Gizmo of the Week: Mouse Genetics (One Trait) ...

With the Mouse Genetics (One Trait) Gizmo™, you will study how one trait, or feature, is inherited. 1. Drag two black mice into the Parent 1 and Parent 2 boxes. Click Breed several times. What do the offspring look like? All the offspring that resulted from this were black. The appearance of each mouse is also called its phenotype. 2.
