translational research using mouse cancer models.

Mouse Models of Human Blood Cancers | SpringerLink

Emphasizing why mouse models are valuable in vivo systems for understanding disease mechanisms and developing therapeutic strategies for human blood cancers, "Mouse Models of Human Blood Cancers: Basic Research and Pre-clinical Applications," edited by Shaoguang Li, aims on presenting thorough analyses of the pathological features and the molecular bases of several major types of blood cancer and to describe translational research using mouse cancer models.

Mouse Models of Human Blood Cancers - Basic Research and ...

Mouse models that recapitulate human malignancy are valuable tools for the elucidation of the underlying pathogenetic mechanisms and for preclinical studies. Several genetically engineered mouse models have been generated, either mimicking genetic aberrations or deregulated gene expression in chronic lymphocytic leukemia (CLL).

Mouse models in the study of chronic lymphocytic leukemia ...

Mouse Models of Human Blood Cancers . By . Publisher: The Mouseion at the JAXlibrary. Year: 2008. OAI identifier: oai:mouseion.jax.org:stfb2000_2009-2704 Provided by: The Jackson Laboratory: The Mouseion at the JAXlibrary. Download ...

Mouse Models of Human Blood Cancers - CORE

Read "Mouse Models of Human Blood Cancers Basic Research and Pre-clinical Applications" by available from Rakuten Kobo. In this book, Dr. Li and his author team plan to emphasize why mouse models are useful in vivo systems for understanding...

Mouse Models of Human Blood Cancers eBook by ...

A doxycycline (DOX) -inducible MLL-AF9 mouse model was used in an attempt to directly address the target cell type question by purifying different cell populations such as long-term HSCs (LT-HSCs, Lin - CD34 - Sca-1 - c-Kit + CD150 + CD48 -) and GMPs. 38 Induced MLL-AF9 expression in LT-HSCs (MLL-AF9-LT-HSC) produced a highly aggressive short latency leukemia that was resistant to chemotherapy, whereas MLL-AF9-GMP leukemias had a longer latency and were more responsive to treatment ...

Mouse models of MLL leukemia: recapitulating the human ...

The title of this book is Mouse Models of Human Blood Cancers and it was written by Shaoguang Li $\frac{Page}{2}$

(Editor). This particular edition is in a Paperback format. This books publish date is Sep 19, 2014 and it has a suggested retail price of \$199.99. It was published by Springer and has a total of 320 pages in the book.

Mouse Models of Human Blood Cancers: Basic Research and ...

Mouse models of MLL leukemia: recapitulating the human disease. Chromosome translocations involving the mixed lineage leukemia (<i>MLL</i>) gene fuse it in frame with multiple partner genes creating novel fusion proteins (MLL-FPs) that cause aggressive acute leukemias in humans. Animal models of human disease are important for the exploration of underlying disea

Mouse models of MLL leukemia: recapitulating the human ...

Immunotherapy has revolutionized cancer therapy, largely attributed to the success of immune-checkpoint blockade. However, there are subsets of patients across multiple cancers who have not shown robust responses to these agents. A major impediment to progress in the field is the availability of faithful mouse models that recapitulate the complexity of human malignancy and immune contexture ...

Mouse Models for Cancer Immunotherapy Research | Cancer ...

When human CD34+ cells from umbilical cord blood were transplanted into this strain, the engraftment rate in the peripheral circulation, spleen, and bone marrow were significantly higher than that in NOD/Shi-scid mice treated with anti-asialo GM1 antibody or in the beta2-microglobulin-deficient NOD/LtSz-scid (NOD/SCID/beta2m(null)) mice, which were as completely defective in NK cell activity ...
