Management of Head and Neck
Cancer~~

Head and neck cancer is one of the most frequent malignances worldwide. Despite the site-specific multimodality therapy, up to half of the patients will develop recurrence. Treatment selection based on a multidisciplinary tumor board represents the cornerstone of head and neck cancer, as it is essential for achieving the best results, not only in terms of outcome, but also in terms of organ-function preservation and quality of life.

The goal of this conference is to outline practical treatment strategies for patients with early and advanced head and neck cancers. The multidisciplinary approach to care will be featured along this spectrum. We will address topics relevant to practitioners involved in the diagnosis, management, surveillance, and supportive care of these patients.

It is an enormous privilege and a great pleasure to introduce the 5th edition of the UK Multi-Disciplinary Guidelines for Head and Neck Cancer. Akin to the 4th edition,¹ each aspect of the guideline has been developed by an expert team, often multidisciplinary. An affirmation of the true multidisciplinary nature of these guidelines is the
