Melodic Decoration & Pedals. Apart from ornaments, melodies can also be \u201cdecorated\u201d in other ways. Basically this means using notes which don't exist as part of the supporting chord at that moment in time. If the harmony has a chord of G major, for example, and the melody has an A, the A is a \u201cnon-chord\u201d tone and is there for decorative purposes. Think of it like this: if the A wasn't there, the underlying harmony would be unchanged.

Music theory has no axiomatic foundation in modern mathematics, although some interesting work has recently been done in this direction (see the External Links), yet the basis of musical sound can be described mathematically (in acoustics) and exhibits "a remarkable array of number properties". Elements of music such as its form, rhythm and metre, the pitches of its notes and the tempo of its pulse can be related to the measurement of time and frequency, offering ready analogies in geometry.
