This propensity to music - this "musicophilia"- shows itself in infancy, is manifest and central in every culture, and probably goes back to the very beginning of our species." The book begins with Dr. Sacks retelling an extraordinary story of a man who was hit by lightning, had a near-death experience, and became obsessed with the original musical scores his mind was constantly and uncontrollably creating.

Musicophilia: Tales of Music and the Brain, Revised and ...  
In Musicophilia, he examines the powers of music through the individual experiences of patients, musicians, and everyday people-from a man who is struck by lightning and suddenly inspired to become a pianist at the age of forty-two, to an entire group of children with Williams syndrome who are hypermusical from birth; from people with "amusia," to whom a symphony sounds like the clattering of pots and pans, to a man whose memory spans only seven seconds-for everything but music.

Part two A Range of Musicality looks at musical oddities musical synesthesia. Parts three and four are titled Memory, Movement, and

Musicophilia - Wikipedia  
"Music, uniquely among the arts, is both completely abstract and profoundly emotional. It has no power to represent anything particular or external, but it has a unique power to express inner states or feelings. Music can pierce the heart directly; it needs no mediation." ? Oliver Sacks, Musicophilia: Tales of Music and the Brain
