Leading experts will discuss the effects of the virus in cases of co-morbidities, new treatment approaches, mental health aspects of the pandemic, and convey the results of survey studies. The book will be an excellent resource for researchers studying virology, metabolic diseases, respiratory disorders, and clinical scientists, physicians, drug companies, and healthcare services and workers.

Clinical, Biological and Molecular Aspects of COVID-19 ...  
For the last couple of years there have been noted some quite remarkable tendencies in the practice of informed consent in clinical trials. With paramount aspects such as disclosure of information, patient's understanding, autonomy, competence and mental capacity, giving consent transforms into a process with far more strict requirements than in the past.

Informed Consent in Clinical Trials: 5 New Trends and Aspects  
Premature births, musculoskeletal diseases, diabetes mellitus, and psychiatric disorders. Nutrition plays a direct or indirect role in the causes, treatment, and/or management of many chronic disorders and diseases, yet nutritional and dietary intervention is often left solely to paramedical staff. This book shows why nutritional and dietary interventions by physicians often are necessary and ...

Previous studies have shown that EEG and MEG cortical oscillations in specific frequency bands (i.e., delta, theta, alpha, beta and gamma) are functionally related to cognitive processing and behavior, and that abnormal patterns correlate with pathophysiological processes of neuropsychiatric disorders. Basar have proposed that these cortical oscillations may interact with each other as ...
