This book considers the syntax and semantics of non-verbal predicates (i.e., nominal, adjectival and prepositional predicates) in copular sentences. Isabelle Roy explores how a single structure for predication can account for the different interpretations of non-verbal predicates. The book departs from earlier studies by arguing in favor of a ternary distinction between defining / characterizing / situation-descriptive predicates rather than the more common stage-level/individual distinction.

Non Verbal Predication Copular Sentences At The Syntax ...
This book presents a novel account of syntactic and semantic variation in copular and existential sentences in Classical Hebrew. Like many languages, the system of Classical Hebrew copular sentences is quite complex, containing zero, pronominal, and verbal forms as well as eventive and inchoative semantics.

Syntactic and Semantic Variation in Copular Sentences ...

The Copula In German, the copula sein occurs with a variety of non-verbal predicates10: (13) a. adjective dass Peter brav ist that Peter good is ⟨that Peter is good⟩ b. nominal dass ihr Bruder (ein) Lehrer ist that her brother (a) teacher is ⟨that her brother is a teacher⟩ c. locative dass die Kinder im Hof sind that the children in+the yard are ⟨that the children are in the yard⟩ d. particle dass Peter schon weg ist that Peter already away is ⟨that Peter is already gone⟩ 10 ...

The English copular verb be has eight forms (more than any other English verb): be, am, is, are, being, was, were, been.Additional archaic forms include art, wast, wert, and occasionally beest (as a subjunctive).For more details see English verbs.For the etymology of the various forms, see Indo-European copula.. The main uses of the copula in English are described in the above sections.

Predication, nonverbal stative predicates, and copular ...

This text concerns the interpretation and structure of non-verbal predicates in copular sentences (i.e. sentences with the verb 'be'). The author provides a unifying analysis based on a ternary distinction between defining/characterizing/ situation-descriptive predicates.

copular sentences in russian vs spanish at the syntax ...

The verb serving that function is "seem" in the case of (3), "be" in the case of (4). The simple cases of secondary predication involving phrase types whose subjects are (in English) always dependent on verbs for the instantiation of their subjects, are the kinds we have just seen with copular or quasi-copular verbs.

(PDF) Non-verbal predication: Theory, typology, diachrony

The term equative is used in linguistics to refer to constructions where two entities are equated with each other. For example, the sentence Susan is our president, equates two entities "Susan" and "our president". In English, equatives are typically expressed using a copular verb such as "be", although this is not the only use of this verb. Equatives can be contrasted with predicative constructions where one entity is identified as a member of a set, such as Susan is a president. Different worl
