determining the concentrations in acid-base chemistry. For instance, normality is used to indicate hydronium ions ( $\text{H}_3\text{O}^+$ ) or hydroxide ions ( $\text{OH}^-$ ) concentrations in a solution.; Normality is used in precipitation reactions to measure the number of ions which are likely to precipitate in a specific reaction.

precipitation reactions.

For most other situations, molarity or molality are better options for units.

Normality Example #1 .

The easiest way to find normality is from molarity. All you need to know are how many mole of ions dissociate.

For example, a 1 M sulfuric acid ( $\text{H}_2\text{SO}_4$ ) is 2 N for acid ...
