Open Source Intelligence (OSINT) is the collection and analysis of information that is gathered from public, or open, sources. [1] OSINT is primarily used in national security, law enforcement, and business intelligence functions and is of value to analysts who use non-sensitive

intelligence in answering classified, unclassified, or proprietary intelligence requirements across the previous intelligence disciplines.

Open-source intelligence - WikiMili, The Best Wikipedia Reader
According to U.S. public law, open source intelligence: Is produced from publicly available information. Is collected, analyzed, and disseminated in a timely manner to an appropriate audience. Addresses a specific intelligence requirement. The important phrase to focus on here is "publicly available.".
