Openamip
OpenAMIP is an IP based protocol that facilitates the
exchange of information between an Antenna Controller Unit
and a satellite router. It allows the router to command the
antenna and enables the use of Automatic Beam Switching
(ABS), which transfers connectivity from one satellite beam to
the next as a vessel passes through multiple footprints.

OpenAMIP - Link Communications Systems
OpenAMIP is an IP-based protocol that facilitates the
exchange of information between an antenna controller unit
and a satellite.

OpenAMIP - ST Engineering iDirect
Figure 2: Sample Communication between Modem & ACS
using OpenAMIP The "ident" message is an example of an
extension and is not a general purpose OpenAMIP command.
It is used to pass information about the antenna components
to the modem, for reporting to the hub. This message must
be sent upon initial connection between the ACS and the
modem.

Where To Download Openamip

I want to control an iDirect modem (7000 infinity) through openAMIP protocol over UDP. I´ve modified the options file as it is shown in the openAMIP implementation document, but it does not seem to work, and I don´t know if it is possible to configure the openAMIP protocol on the iDirect modem by using iSite. The iDirect documentation says there are some design references (as reference ...
