This book is a solution manual of the 110 questions that were presented in the eight chapters throughout the author ' s previous book, Optimal Control Engineering with MATLAB. The manual is prepared as an independent book since it includes the problems ' questions, figures, and all necessary equations and formulas in a summarizing fashion and within the given solution frameworks.

Solution Manuals

Optimal control relies on solving the matrix design equations developed in the book. These equations can be complicated, and exact solution of the Hamilton-Jacobi equations for nonlinear systems may not be possible. The last chapter, on optimal adaptive control, gives practical methods for solving these matrix design equations.
