**Suite**, is the page layout. It identifies the scope of the personalizations you are about to make, as well as to what personalization level(s) and value(s) these personalizations apply.

## ~~Oracle Application Framework Personalization Guide~~

Forms Personalization provides tools to perform the same configurations, in the form of a Form. (Say that fast, huh?) Open any Form in 11i10, and go to Help -> Diagnostics -> Custom Code -> Personalize. This brings up the Personalization Form in the context of the Form and Function that you were in.

personalization level set to "Site". In the Choose Personalization Context page, use the Scope poplist to specify whether you want to personalize the current page, or personalize a shared region, if any, that is extended by the current page. If there are no shared regions on the page, a single non-updateable radio button for the page itself is displayed for the scope.
