Oracle Database Backup and Recovery User's Guide

You can use Oracle Secure Backup, which supports both database and file system backups to tape, as your media manager. See Oracle Secure Backup Administrator's Guide to learn how to set up RMAN for use specifically with Oracle Secure Backup. If you do not use Oracle Secure Backup, then you can use a third-party media manager.

Configuring the RMAN Environment - 11g Release 2 (11.2)

Sometimes you may need to distribute the RMAN Backups to multiple disks or mount points for IO Performance or Capacity problem on Disks. Normally if you have one disk or mount point like /backup and there is enough capacity for backups, you can start the backup as follows.

How to Distribute the RMAN Backups for Multiple Disks in ...

11 Using RMAN to Back Up and Restore Files. This chapter describes backup strategies using Oracle Recovery Manager (RMAN) with Data Guard and standby databases. RMAN can perform backups with minimal effect on the primary database and quickly recover from the loss of individual datafiles, or the entire database.

Using RMAN to Back Up and Restore Files - Oracle

Using Oracle RMAN, you can take a hot backup for your database, which will take a consistent backup even when your DB is up and running. This tutorial gives you an introduction on how to perform Oracle DB backup using RMAN. For the impatient, here is the quick snippet, that takes RMAN backup of both database and archive logs.

How to Backup Oracle Database using RMAN (with Examples)

Basic Concepts of Backup and Repository Maintenance. The RMAN maintenance commands are summarized as follows: The CATALOG command enables you to add records about RMAN and user-managed backups that are currently not recorded in the RMAN repository, or to remove records for backups that are recorded.. The CHANGE command enables you to update the status of records in the RMAN repository.

A guide to backup and recovery of Oracle databases, including RMAN backup and recovery, RMAN data transfer, Oracle Flashback Technology, and user-managed backup and recovery Go to main content 1/47

Database Backup and Recovery User's Guide - Oracle

In Oracle Database 11g, RMAN does the smart thing: it bypasses backing up the committed undo data that is not required in recovery. The uncommitted undo data that is important for recovery is backed up as usual. This reduces the size and time of the backup (and the recovery as well).

Oracle Database 11g: The Top New Features for DBAs and ...

RMAN automatically backs up the control file and the server parameter file (if the instance was started with a server parameter file) when data file 1 is included in the backup. If control file autobackup is enabled, then RMAN writes the current control file and server parameter file to a separate autobackup piece.

Backing Up the Database - Oracle

Oracle 11g introduced the ability to create duplicate databases directly without the need for a backup. This is known as active database duplication. The process is similar to the backup-based duplication, with a few exceptions. First, and most obviously, you don't need a backup of the source system, but it does have to be in ARCHIVELOG mode.

Duplicate a Database Using RMAN in Oracle Database 11g ...

Oracle RMAN 11g Backup and Recovery explains how to configure databases, generate accurate archives, and carry out system restores. Work from the command line or Oracle Enterprise Manager, automate the backup process, perform Oracle Flashback recoveries, and integrate cloud computing technology.

Encrypted RMAN Backup Tips. Expert Oracle Database Tips by Donald BurlesonMarch 25, 2015. Creating Encrypted RMAN Backups and Recovery . It is very simple to restore the database created by RMAN using simple commands. If someone has stolen the backup of the database, they can easily restore it and steal all our data, too.

Encrypted RMAN Backup Tips - Burleson Oracle Consulting

SQL> CONNECT AUXILIARY SYS/oracle@dupdb; SQL> CREATE SPFILE FROM PFILE= auxiliary instance pfile; SQL> STARTUP NOMOUNT; Then run the following RMAN commands to duplicate the database: RMAN> CONNECT TARGET /; RMAN> CONNECT CATALOG rman/cat@catdb; RMAN> CONNECT AUXILIARY SYS/oracle@dupdb; RMAN> DUPLICATE TARGET DATABASE TO dupdb;

Using RMAN DUPLICATE DATABASE: Examples

In Oracle 11g, the validate command was expanded with new features. The syntax of the new validate command is the same as the syntax of the backup validate command. With the new validate command, almost everything that needs to be checked can be done. For example, to check validity of the backup of the spfile, use the following command:
