Reviews published on advances in scientific and clinical aspects of orthodontics should address a specific question or issue that is relevant to academics or clinical practice of orthodontics and should provide an evidence-based, balanced, patient-oriented current review on a focused topic.

Guide for authors - Journal of the World Federation of ...

The author addresses these issues by presenting data from the first randomized clinical trial in orthodontics and from a survey of the current literature. Results: The clinical trial involved subjects who had Class II malocclusion. The researchers who conducted the trial found no difference in the quality of the dental occlusion between the children who had early treatment and those who did not, as judged by both an occlusal index (Peer Assessment Rating scores) and the percentages of the ...
