The G122-824 PI Servoamplifier is used in closed loop applications where a proportional and/or integral amplifier is needed. Selector switches inside the amplifier enable proportional, integral or both to be selected. Many aspects of the amplifier ' s characteristics can be selected with internal switches.

P I Servoamplifier G122 824 Welcome To The Myles Group

The G122-829 P-I Servoamplifier is used in closed loop applications where a proportional and/or integral amplifier is needed. Selector switches inside the amplifier enable proportional, integral or both to be selected. Many aspects of the amplifier ' s characteristics can be selected with internal switches.

P-I Servoamplifier G122-829 - Moog Inc.

The G122-829A001 is a general purpose, user configurable, P-I servoamplifier. Selector switches inside the amplifier enable either proportional control, integral control, or both to be selected. Many aspects of the amplifier ' s characteristics can be adjusted with front panel pots or selected with internal switches.

P-I Servoamplifier G122-829A001 - Moog Inc.

The G122-829A P-I Servoamplifier is used in closed loop applications where a proportional and/or integral amplifier is needed. Selector switches inside the amplifier enable proportional, integral or both to be selected. It accepts three input signals, one single ended and two differential.

G122-829A P-I Servo Amplifier - Moog Inc.

G122-824-002 NEW MOOG P-I Servoamplifier | eBay

The G122-826-001 is a general purpose, user configurable P-I servoamplifier with a power supply input filter suitable for automotive use. It can also be used in industrial applications, where its unique features make it particularly useful. Selector switches inside the amplifier enable proportional control, integral control or both to be selected.
