Piper / PA-18 Super Cub - Barnstormers

The Piper PA-18 Super Cub is a two-seat, single-engine monoplane introduced in 1949 by Piper Aircraft, it was developed from the Piper PA-11, and traces its lineage back through the J-3 to the Taylor E-2 Cub of the 1930s. In close to 40 years of production, over 9,000 [citation needed] were built. Super Cubs are commonly found in roles such as bush flying, banner towing and glider towing

Piper PA18 150 Cub, G-OTUG, 31 March 1984 - GOV.UK

G-DRGL PA-18-150 Super Cub. This aircraft was an ex Dutch Air Force Aircraft that was imported in the early 1980's into the UK. It was partially rebuilt then but remained unfinished and stored until 2014. The aircraft was given a complete frame up restoration and the more powerful 150HP engine was installed in place of the original 135HP model. The Aircraft is now resident with Goodwood Aero Club where it is used for PPL training, Tail wheel conversions and banner towing.

G-DRGL PA-18-150 Super Cub - CAV Aircraft Services Ltd

The design of the PA-18 Super Cub was based on the design of earlier designs. However, the addition of an electrical system, flaps (3 notches), and a more powerful 150 horsepower engine make it a very different flying experience. The standard Super Cub is fitted with a 150 horsepower Lycoming engine, but some are equipped with a 180 horsepower engine. The Super Cub's high-lift wing and powerful engine make it a prime candidate for conversion to a floatplane or skiplane.
