Pacific Power Source Symposium 2011 January 10 14 2011

Irvine, Calif., February 1, 2011- Pacific Power Source introduces the 390-ASX, the latest addition to its line of manual and programmable AC Power Sources. With 9kVA in a 9U chassis, the 390-ASX offers the high power density demanded in today's AC Test Power market. This unit builds on the proven technology found in Pacific Power [...]

Reliable high power source & collector module 1. Reliable high power source & collector module 1. Long-term source operation with 100 W at IF and 5MJ/day 1. Mask yield & defect

2011 International Symposium on Extreme Ultraviolet ...

Pacific Power Source designs and manufactures both linear and switched mode (PWM) AC Power Sources. We provide technically advanced, reliable, and cost effective standard and custom precision programmable AC Power Solutions that feature fast transient response, tight regulation, high peak current capability, no switching noise (linear) and low switching noise (PWM switching) models and low ...

Programmable AC Power Supplies | Pacific Power Source

IEEE Power and Energy Society The mission of IEEE Power & Energy Society is to be the leading provider of scientific and engineering information on electric power and energy for the betterment of society, and preferred professional development source of its members. IEEE Power and Energy Society

Welcome to the 2019 Pacific Symposium on Pulsed Power and Applications! Hawaii serves as a convenient location between the US and Asian main lands, and is intended to provide more intimate opportunities for social and technical interaction than similar Plasma and Pulsed Power Conferences between the American, Japanese, Chinese and Korean communities.

2019 Pacific Symposium on Pulsed Power and Applications

Pacific Power Source's new PPSC Manager software allows exceptional Control of Pacific AC Power Source's AFX Series AC & DC capable power sources. Operated through either, LAN with LXI support, USB or RS-232, all AFX Series modes and capabilities are supported to allow full and easy control and measurement of these sophisticated power ...

Commissioner's Message. I am pleased to present the OEM 2010/2011 Biennial Report. This report outlines OEM's major work over the past two years, including planning for and responding to severe weather, power outages, water main breaks, and other incidents, as well educating the public on how to prepare for emergencies and supplying vital information to our partner agencies.

OEM Biennial 2011 - New York City

Seabrook power plant was proposed as a twin-reactor plant in 1972, at an estimated cost of \$973 million. When it finally won a commercial license in March 1990, it was a single reactor which cost \$6.5 billion. Over a period of thirteen years more than 4,000 citizens, many associated with the Clamshell Alliance anti-nuclear group, committed non-violent civil disobedience at Seabrook:
