The Master Validation Plan provides a roadmap to management for on-time start-up of facility operations, and validation of existing facilities, in compliance with GMP requirements. The lack of a comprehensive Master Validation Plan and well-documented validation procedures is the main reason that new drug, medical device, medical equipment, and related product applications are rejected by the FDA.

How to Write a Validation Master Plan? :

Pharmaceutical ...

The Validation Master Plan is a top layer document and should not go into specific detail; but present an overall picture of the company facility, organisation and capability. It must give a clear and concise overview, to a reviewer, of how the company has integrated all the applicable cGMP requirements into every aspect of its operations.
