~~Pharmacotherapy is the most commonly used treatment method for psychiatric disorders. Many patients experience medical diseases concurrent with psychiatric disorders.~~

~~Pharmacovigilance in Psychiatry- An Introduction | Request PDF~~
~~The discipline of pharmacovigilance is of particular importance in the field of psychiatry. Pharmacotherapy is the principal modality of management in several psychiatric disorders and psychotropic drugs are associated with a variety of adverse drug reactions. Over the past decades, pharmacovigilance activity has led to the identification of several adverse drug reactions caused by psychotropic drugs, resulting in their withdrawal from the market or restrictions in use.~~
